

Fit for Teaching – Basics of Teaching and Learning at University Level 1

Date & Time: November 4, 1.00 pm - 2.30 pm
November 11, 1.00 pm - 2.30 pm
November 18, 6.00 pm - 7.30 pm

Location : Three online sessions

Lecturer : Dr. Sandra Linke

Credits : 1

Description

Teaching is not an easy job; especially when you are new in teaching. Several questions like how to design courses and which teaching methods support students learning processes will come to your mind because you want to do a good job.

During this online course you will get to know instruments which may help to master your first teaching experience. These instruments can be adapted for your own teaching purposes.

You will learn how to design university courses taking into account the conditions of learning and the intended competences. You will be introduced to teaching strategies and teaching methods which you can use in order to motivate and activate your students. In addition you will also have the possibility to reflect upon your role as a University teacher and we will reflect on successful communication and interaction within University courses.

As a precondition of this course, you should have in mind a certain course you want to give or you want to improve. It is necessary to prepare (as a preparation task) a lesson plan from a lesson you are going to teach. If you have no teaching experience up to now, ask your colleagues in order to get some ideas about a certain course, exercise or lesson you might teach in the near future.

In general, you will have a lot of opportunities in order to use cooperative methods.

The main objective of this online course is that you are able to teach in a learner-centered manner. This course is addressed to persons who start teaching in University contexts. Attending this course you will gain more certainty in teaching and you will be able to design your courses more quickly and effectively.

About the Lecturer

Dr. Sandra K. Linke studied Education, is a specialist in gifted education and made her Ph.D. in the field of Creativity. Since 2015 she is working in the field of “Hochschuldidactics”, giving a number of workshops and as she has established, in cooperation with Taisir Yamin and Todd Lubart, the International Centre for Innovation in Education (ICIE), her hobby is still helping children to develop her full potential.
